

Cloud Services Design Engineer

Job Description

You will work on new technologies enabling smooth interaction between distributed embedded resources. Making society to be more smart and competitive in digital systems by ensuring privacy of sensitive information in safety, business and privacy sensitive applications. You will be part of our research team developing hard and software solutions for the mentioned applications with our international R&D partners and customers.

Your Responsibilities

- Development of cloud based services including test concepts.
- Design and setup of IT architectures using cloud technology mostly for AWS.
- Architect environments considering high availability, scalability and security aspects.
- Setup of tools and workflows for continuous integration and deployment.
- Development of software concepts for mobile applications.
- Contribution to new R&D activities within our international research projects.

Your Tech-Profile

- Very good knowledge of the programming languages - JAVA is mandatory.
- Good knowledge of the programming languages Python and/or Ruby.
- Profound experience with Linux and Amazon Web Services.
- Experiences with APIs, orchestration, automation, DevOps and databases like NoSQL.
- Expertise in software test methods and their application to projects.

Your Personality-Profile

- Balanced mixture of team worker and independent and flexible work style.
- Project execution on your own responsibility.
- Your satisfaction comes from providing solutions on technical AND customer level.
- Advanced English skills are mandatory; German is a plus.

Min. Experience Level: You bring first experience from your university projects (Bachelor or Master Thesis), from private interest, from internships or short term professional engagements.

Education Level: University **bachelor or master degree** in telematics, computer science, electronics, informatics.

As a Company we offer

We offer an international environment where you can **be yourself** and your **opinion counts**.
